JOURNAL OF
MATHEMATICS EDUCATION
AT TEACHERS COLLEGE

A Century of Leadership in Mathematics and Its Teaching

Developing and Supporting Teachers' Mathematical Pedagogy

ABOUT THE AUTHORS

Song A. An
Song A. An, Ph.D., is an associate professor in Mathematics Education at The University of Texas at El Paso. His current research is about generating and evaluating innovative teaching strategies, especially play and game based, that can more effectively engage students in learning mathematics via such pedagogical strategies as problem-solving, simulations, discovery, contextualized challenges, and interdisciplinary projects. He is the recipient of the University of Texas System Regents' Outstanding Teaching Award in 2017.

Brian Darrow Jr.
Brian Darrow, Jr. is an Assistant Professor of Mathematics at Southern Connecticut State University. A former high school mathematics teacher, he currently teaches college developmental advanced, and preservice teacher mathematics courses. He earned his Ph.D. from Teachers College, Columbia University where he also served as the Editor for the Journal of Mathematics Education at Teachers College for the tenth and eleventh anniversary issues. His current research interests are in combinatorial design theory, number theory, the psychology of mathematics education, and longitudinal cohort studies in education.

Alyse C. Hachey
Alyse C. Hachey, Ph.D., is the Co-Chair of the Teacher Education Department, Division Director of BELSS (Bilingual Education, Early Childhood Education, Literacy Education and Sociocultural Studies), Associate Professor and lead faculty for Early Childhood Education at The University of Texas at El Paso. Her teaching and research interests focus on early childhood cognition and curriculum development and post-secondary online learning and retention, particularly for college populations often designated at high-risk of dropout.

Elana Reiser
Elana Reiser studied mathematics at Binghamton University and mathematics education at Columbia University. She has taught at St. Joseph's University since 2002. She is interested in all aspects of mathematics education with a focus on teaching proofs, 3D printing, cooperative learning, and student engagement. She is the author of the books Teaching Mathematics Using Popular Culture, 3D Printing in the K-12 Mathematics Classroom, and The Science of Learning Mathematical Proofs.

Evthokia Stephanie Saclarides
Evthokia Stephanie Saclarides is an Assistant Professor of Mathematics Education at University of Cincinnati. Her research explores how coaches can provide high-quality professional development for teachers. She is a former elementary and middle school teacher, instructional coach, and administrator.

Philip Sadler
Philip Sadler directs the Science Education Department at the Harvard-Smithsonian Center for Astrophysics and is F.W. Wright Senior Lecturer in Astronomy. He holds a B.S. in Physics from MIT and an Ed.M. and Ed.D. from Harvard. He has taught middle school mathematics, science, and engineering, as well as undergraduate science and graduate teaching courses. He conducts research on the STEM education pipeline, the effectiveness of STEM pedagogy, and preparation for college calculus success.

Karime Smith
Karime Smith is currently a PhD student of Teaching, Learning and Culture with an emphasis on STEM Education at the University of Texas at El Paso. She is a visual arts instructor with over 10 years of experience. Her current research interests lie in math learning, visual mathematics, creativity, and underrepresented minorities in STEM education.

Gerhard Sonnert

Gerhard Sonnert is a senior research scientist in the Harvard College Observatory and a lecturer on astronomy at Harvard University. He holds an MA and a doctorate in sociology from the University of Erlangen, Germany, and a master's in public administration from Harvard University. He has worked on several large survey studies in science, technology, engineering, and mathematics (STEM) education and has particularly focused on gender aspects in STEM.

Daniel A. Tillman

Daniel A. Tillman, Ph.D., is an Associate Professor in Educational Technology at The University of Texas at El Paso (UTEP) as well as the co-director of the College of Education Makerspace. His current research focuses on the diffusion of technology innovations into K-12 education, physical and digital multimedia in elementary school science and mathematics education, and the STEM career pipeline and mainline. He teaches both graduate and undergraduate courses about instructional technology and instructional design.

Jenna Trusnovec

Jenna Trusnovec is currently a graduate student at St. Joseph's University, achieving her MA in Mathematics Education in May 2023. Jenna is also a math teacher at a public high school on Long Island, where she teaches 10th and 12th grade students Algebra 2 and elective math courses.
Carol Wade

Carol Wade is an Associate Professor in the Department of Education and Human Development at the State University of New York (SUNY) Brockport. She teaches in the Undergraduate and Graduate Secondary Mathematics Education Programs. She holds a Ph.D. from Clemson University and completed post-doctoral work at the Center for Astrophysics, Harvard & Smithsonian. While teaching high school mathematics she was National Board Certified in Adolescence Young Adult Mathematics and certified in both AP Calculus and Statistics. Her focused transition research from upper-level secondary mathematics to college calculus naturally follows her career as a high school mathematics teacher.

Christian Wilkens

Christian Wilkens is Chair of the Department of Education & Human Development at SUNY Brockport. He holds degrees from Harvard, the University of Mississippi and Cornell. He has taught high school science and special education in Mississippi and Alaska, as well as undergraduate and graduate courses for pre- and in-service teachers. His current scholarship focuses on school leadership and instruction in rural Alaska, and on pathways to diversify the teaching profession.
