

Columbia University Libraries Publishing Journals Author Permissions Instructions

This document provides a brief overview of Columbia University Libraries permissions requirements and is intended to assist you in obtaining the rights required for **publishing third-party images or texts** when these materials are not in the public domain or do not fall under “fair use” guidelines.

What Columbia University Libraries Requires:

Authors of underlying materials must grant Non-exclusive, perpetual worldwide publishing rights for use of the identified image(s) or excerpt(s) within the article to be included in the journal. As the Author you will need to provide either:

- A copy of the signed permissions form, as a mailed hard copy or scanned PDF; or
- In the case of no response from the rights holder, the entire Email correspondence, documenting your original request and subsequent attempts to make contact. Submit the documentation to your journal editor with your manuscript materials for further consideration and next steps.

Third-Party Contracts:

Literary agents and image sources (e.g., Getty, ARS, Corbis) will require you to sign their own contract* or licensing agreement, and may request specific information about the usage of the material. Make sure that nothing in the contract language conflicts with any of the rights required by Columbia University Libraries that are listed above.

Examples of language that is unacceptable in a permission grant or usage terms:

- Territory limits such as “North American only”
- Term limits for the online version of the journal, such as 5 years
- Exclusion or limitation of electronic rights, including restrictions based on URL or password-protected access
- Indemnities are clauses in contracts that may require you or your publisher to cover the losses of the other party to the contract if your activities cause them direct or indirect financial harm. Columbia University Libraries will not as a matter of course indemnify literary or image agents. We suggest that you ask to remove any indemnity clauses found in third-party agreements.

*Before signing a contract or paying a fee, run the contract by your journal’s editor for assessment.

Notes:

- **Fees:** Consider asking the rights holder to waive fees, since DUP is a not-for-profit publisher and the work is of a scholarly nature.
- **Copies for rights holder:** If print and/or electronic copies (of the article or issue in which it appeared) are a condition for the grant of permission, you, the author, are responsible for providing these copies.
- **Fair use:** Fair use is a provision in US copyright law stating that copyrighted material may, under certain circumstances, be used for purposes such as comment, criticism, news reporting, teaching, and research, without the need for permission from or payment to the copyright holder. For more information about how to apply fair use to your circumstances, consult Columbia University’s Copyright Advisory Services and its [offices resources on fair use](#). If you feel that the discussion of an image or text excerpt in your article (or within the caption accompanying the image) may not provide sufficient context

to legitimately claim fair use, consider strengthening the discussion or reducing the amount of quoted text. Fair use varies by country and by the particular facts of each publishing situation. The [Fair Use Checklist](#) may help you to decide whether your use of copyrighted material falls under fair use.

- **Creative Commons:** Materials marked with a [Creative Commons license](#) can be reused without permission or fees according to the terms of the license. Creative Commons licenses vary greatly by version, and every image repository site (even if the image is in the public domain) may have its own terms of use. It is your responsibility to ensure that none of these terms or restrictions conflict with Columbia University Libraries core rights requirements, stated above.
- **Public Domain:** Generally speaking, works published in the United States before January 1, 1924, and all U.S. Federal government publications are part of the public domain. No permission is required for their use, but you must cite the source of the material. Artworks enter the public domain in the U.S. 70 years after the death of the creator. You will need to fully investigate the source and usage terms of any “public domain” or “free use for scholarship” website from which you obtain an image. For help determining whether a work is in the public domain or requires copyright permissions.
- **Due Diligence:** If you are unable to locate the rights holder, fully document your attempts to make contact and share this documentation with your journal editor. Repeated attempts with no success are necessary to prove due diligence, which may allow use without a grant of permission.
